196 MODE

TOUSLED TEXTURE

Working from the bottom layer to the top, wrap two-inch sections of hair around a one-and-a-half-inch curling iron held vertically. Wrap each section in alternating directions and leave the ends out. "This makes it look a little more undone—not too classic," explains Durfee. When you reach the top layer at the crown, flip the curling iron and wrap the sections around it horizontally. This method produces a wave rather than a curl, to complete the effortless feel.
